MFT1553 On-site
The complete certification package from tests to certificates

- **Complete 17th Edition compliant testing and certification**
- **Combined insulation, continuity, loop and RCD tester**
- **Over 25 different certificate supported**
- **Widest range of operating platforms**
- **The route to faster invoicing**
- **Supports Laptops, PDAs, Palms and Smartphones**
- **Bluetooth® connectivity**

DESCRIPTION

Using the MFT1553 On-site package means that you can perform all of the tests required by the regulations and complete test certificates on site at the time the tests are taken.

Certificates can be created and completed on laptops or one of over 500 supported mobile devices including, PDAs, Palms and Smartphones.

Powersuite® On-site works on the widest range of available platforms including Windows XP, Windows Mobile 2005, Microsoft Pocket PC 2002, Windows Mobile 5, Palm v5 and Symbian S60 V3.

Once completed it is a simple step to issuing the certificate and invoice for the work to improve efficiency, raise productivity and speed up cash flow.

Eliminate errors that result from the transfer of handwritten results into the final test certificate.

The MFT1553 On Site can be used in a variety of ways:

- A single user can create and complete certificates on site directly from the tester
- Multiple users can complete parts of a larger installation at the same time and test result certificates be combined into a single complete certificate at the end of testing
- Multiple users can compete the same certificate at different times using different testers.
- Multiple users can complete the same certificate at the same time using different testers

Completing a test certificate now could not be easier, take a measurement using the MFT1553 then with the push of a button transfer the result from the tester into the test certificate cell using the testers Bluetooth connectivity and that's it.

Result transfer can be made in one of two ways; by selecting the cell from the MFT1553, or by highlighting the cell the test result is to go within the certificate. Either way the result will be transferred directly into the test result cell.

If a mistake is made and the result is sent to the wrong result cell, it can be resent to the correct cell at any time up to when the next test is taken with the MFT1553.

ORDERING INFORMATION

Item (Qty)	Order No.
MFT1553 Multifunction tester with automatic Bluetooth downloading and PowerSuite On-site software	6111-772
Optional accessories	
PowerSuite Ultra Mobile additional user licence	6111-743
Replacement 3 wire test lead set	6220-796
